## ADEC'S BEGINNINGS

On April 7, 1952, a brave group of parents from our community gathered and decided they wanted something more—something different—for their children with disabilities.

At that time, it was the norm to place people with intellectual and developmental disabilities away in institutions. However, ADEC's founding parents decided to forge their path. Not only did they start a school for them with new possibilities, but they dreamed of their children becoming a part of the community.

The very first employees at ADEC were the parents themselves, working to give their children opportunities no one had thought possible. Now, more than 70 years later, many of these children are senior citizens who still receive ADEC services. As they have grown, so has ADEC.
